Leaders in Infrared Heating Technology

Infra • Switch

The infra Switch is a three channel remotely controlled switch which is capable of switching up to 6KW. Each channel is capable of switching up to 3KW although the total load of all three channels must not exceed 6KW

Features:

- Suitable for use with infrared heaters in Gazebos, Summer Houses and Garden Buildings
- Suitable for use with infrared heaters in Patios and Gardens
- Suitable for lighting in gardens, commercial buildings and in homes
- Suitable for use with infrared heaters in Conservatories
- Switches individual circuits from your seat with the remote control or manually at the control box
- Can be used with all types of infrared heaters

Specification:

- Maximum load current of 13 Amps from any one channel
- Total of 26 Amps from the 3 outputs combined
- All outputs rated for 230/240V-ac
- Each output is fused at 13 Amps
- Unit must be supplied from a 26A switched fused spur
- IR remote control device with approx 6m line of sight activation to control box
- IP rating: IP65
- Designed to take inrush current of quartz halogen lamps
