

Hassett Industries Ltd

Removable Core Immersion Heaters

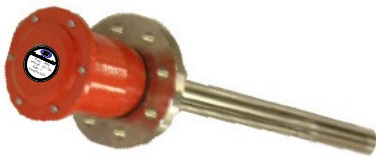

Applications:

Hot water tanks
Chemical tanks
Oil tanks
Bitumen tanks.

Construction:

Stainless steel tubes and flanges for hot water tanks and chemical tanks.
Flanges and tubes can be Teflon coated where aggressive chemicals are present in the tank
Mild steel for oil and bitumen tank applications

Flanges:

Standard of the shelf DIN flanges or purpose manufactured flanges to suit the tank flange.

Terminal Boxes:

Mild steel or stainless steel
approximately IP65

Controls:

Capillary type thermostat and over temperature cut-out fitted as standard
Alternative sensors can be fitted for remote electronic control if required.

Design:

All heaters are individually designed to suit the application.
Detailed drawings can be provided on receipt of order
